

LPM

Guitar 101 (Essentials 2.4)

First barre chords

LESSON NOTES

In order to play in all keys, we need to use chord voicings that don't use open strings.

Using our first finger as a capo, we can learn barre chords. These chord shapes are moveable, and in this lesson you will learn the major and minor shapes on the E string and the A string-so four shapes in total. Using these four shapes, you can play any major or minor chord in any key on the guitar!

Points covered:

- Major barre chord on the E and A string
- Minor barre chord on the E and A string
